## The Benefits of Baby Signing

Enables babies to communicate their needs effectively reducing frustration.  
This improves the parent/child bond and reduces tantrums and other  
behaviour problems.

Helps parents to focus on key words which with the signs, improves babies  
understanding even before they can sign for themselves

When used alongside speech it increases development of spoken language

It is fun! You will be amazed how fast your baby learns and how much they  
know long before they could have the speech to tell you.
